

ANNIE S. KOO

Senior Product & UI/UX Designer

anniekoo.com | annie.sh.park@gmail.com | Irvine, CA (Relocating July 2026)

EXPERIENCE

Design & Growth Strategist (1 Year Contract) | Acts2 Network Taipei | June 2025 - July 2026

- **Design & Strategy Leadership:** Co-lead Journey's campus organization at Fu Jen University, owning digital presence and on-campus strategy while providing leadership and growth coaching to college students. As the most experienced designer on a 10 person cross-functional team, I connect data, design, and event programming to grow a healthy student community.
- **Data-Driven Social Strategy:** Led end-to-end social strategy for Journey, using insight-driven content and experiments to drive a 185% increase in reach, 900+ followers, and 242% more profile visits over 8 months.
- **AI-Enhanced Digital Strategy:** Integrated AI tools (Perplexity) to accelerate strategic ideation and copy drafting; served as the human-in-the-loop to validate AI-generated outputs, ensuring brand integrity and driving a 185% increase in reach.
- **Mentorship & Coaching:** Co-directed campus operations at FJU, planning a steady rhythm of weekly groups and monthly events; provided 1-on-1 mentorship to 10+ students to align community programming with evolving student needs and feedback.

Remote Senior Product Designer | LawnStarter (SaaS startup) | February 2025 - May 2025

- **High-Velocity Growth Execution:** Embedded within Interaction & Growth Design to identify and resolve UX bottlenecks; delivered a suite of high-fidelity prototypes, wireframes, and user flows in Figma for customer-facing features in a rapid 90-day cycle.
- **Heuristic Audit & Roadmap:** Conducted a comprehensive website audit, identifying and prioritizing a backlog of 44+ design opportunities based on usability heuristics and estimated business impact.
- **Landing Pages:** Analyzed and optimized high-intent landing pages for a local services marketplace, utilizing heuristic evaluations to reduce user friction and cognitive load at key entry points.
- **Strategic Handoff:** Developed a centralized documentation system including annotated logic and prototypes, providing a clear implementation roadmap for engineering and product prior to transitioning to a fixed-term contract in Taipei.

Remote Senior Product Designer | Pens.com (eCommerce) | July 2020 - February 2025

- **Conversion Impact:** Spearheaded a multi-phase optimization of the global checkout funnel, driving a 17.47% increase in transactions through data-driven A/B testing and friction reduction.
- **Checkout Redesign:** Architected a comprehensive end-to-end design strategy of the core transactional flow, translating legacy B2B business logic into a scalable, mobile-first modular UI system.
- **Research & Validation:** Led unmoderated testing and heuristic audits to identify funnel friction, utilizing behavioral insights to simplify complex multi-step purchasing workflows.
- **Systems Architecture:** Contributed to and scaled internal Design Systems to ensure a cohesive, accessible (WCAG) experience across global eCommerce web applications.

Product Designer | Events.com (SaaS startup) | December 2017 - July 2020

User-centered design for an online event management software, involving the full design process: user research, competitive analysis, wireframes, user flows, information architecture, interactive prototypes (Axure RP), story writing & epic management (JIRA) all in close collaboration with the product design, development, QA, and customer success teams

- **User Activation Strategy:** Owned the end-to-end UX strategy for the Self-Service Project, transforming complex event data and model logic into a simplified, interactive onboarding experience.

- **Information Architecture:** Architected a new Analytics Framework to simplify multi-step financial and traffic data, providing users with the transparency and trust-building indicators needed for independent management.
- **Technical Ownership:** Managed the design-to-development pipeline by translating usability findings into prioritized JIRA story shells, ensuring high-fidelity implementation of professional features.
- **Design Mentorship:** Nurtured the growth of UX design interns by offering technical mentorship in prototyping and fostering their development within the realm of professional UX design.

UI/UX Design Intern | Lytx, Inc. | June - August 2016

Designed software and app solutions for a data-driven, behavior changing safety program (SaaS) for safety coaches in charge of commercial fleets:

- **Behavioral SaaS Solutions:** Analyzed and redesigned elements of a new software and prototyped an onboarding solution.
- **Cross-Functional Prototyping:** Collaborated with an engineer team to create a high-fidelity prototype with Sketch & Invision of a DVR stand-alone application, giving Lytx's target audience the ability to use Windows.

Visual Design Lead | Acts2 Network San Diego | September 2018 - April 2021

- **Team Leadership:** Led and mentored a team of 7 designers to create marketing materials and digital content.
- **Brand Development:** Conceptualized and developed the branding for SD Klesis, a key subgroup within the organization.
- **Full-Scale Web Ideation :** Contributed to the design and development of course101.online, a major undertaking that involved extensive ideation, collaboration with a project manager, and working alongside artists to create a cohesive and impactful final product
- **Project Management:** Managed projects and team workflow using Asana, ensuring timely delivery of design assets.

Web Designer | University of California, San Diego | June 2015 - June 2016

- Designed research-driven websites for the Scripps Institute of Oceanography and UCSD, utilizing user interviews and card sorting to optimize Information Architecture and usability.

EDUCATION

University of California, San Diego | B.S.in Cognitive Science Human Computer Interaction

SKILLS

- **Design & Strategy:** Interaction Design, Information Architecture, Design Systems & Frameworks, Growth Design, Mobile-First/Responsive Design.
- **Research & Science:** User-Centered Design (UCD), Cognitive Load Optimization, Heuristic Evaluation, User Flows, A/B Testing, Usability Testing
- **Tools & Technical:** Figma (Expert) , AI-Integrated Strategy (Perplexity) , Claude (AI-Augmented Development & Prototyping), Logic Documentation, Prompt Engineering
